SRAS Wireless Lan Setting Guide (Windows10) 2021/11/26

O Wireless network settings

1. Click the Wireless network connection icon at the bottom right of the taskbar and select "SRAS 5G",or "SRAS 2G"

SRAS 5G	susceptible to radio wave interference and is fast, but the usable range is narrow. Use this if you can connect.
SRAS 2G	Supports IEEE802.1 b/g(2GHz). Use this if you have problems with SRAS 5G on devices that do not support 5GHz.

2. Select a destination and click "Connect". (if you put a beauty check in "Automatically connect", it will be connected automatically when it enters the antenna range of SRASwireless LAN.)

- 3. After entering each field, click "OK".
 - Username : Account name of the Center of Science Information
 - Password : Password registered in SRAS wireless LAN with AMI

First graders have the same password as Scomb.
