

SRAS VPN(GlobalProtect) Users Guide

for Android

Rev. 2020/4/4

1

Download and Install GlobalProtect (Developer: Palo Alto Networks) on Android OS from Google Play Store.

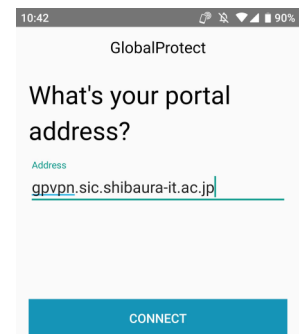

2

Launch the GlobalProtect app and enter the GlobalProtect portal address as below

gpvpn.sic.shibaura-it.ac.jp

Then tap CONNECT

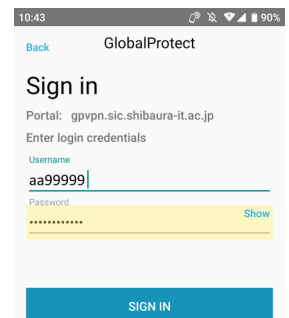

3

Enter your Username*¹ and Password*² (Windows/ADFS of Center for Science Information) , and then tap SIGN IN.

*1 Username must remove @sic and below.

○aa99999 ×aa999999@sic

*2 Password of Windows/ADFS is same one for login to Scomb, you can change it from AMI.

4

When the Connection request message appears, tap OK.

Connection request

GlobalProtect wants to set up a VPN connection that allows it to monitor network traffic. Only accept if you trust the source.

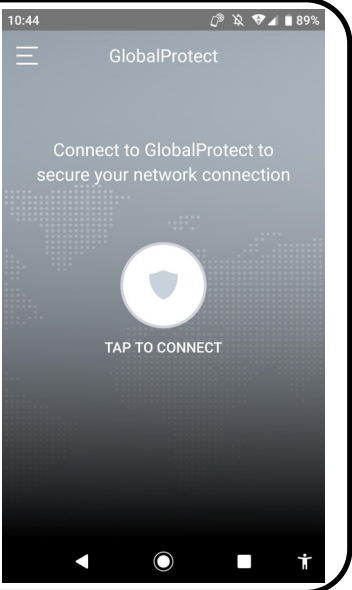

🔒 appears at the top of your screen when VPN is active.

CANCEL OK

How to connect/ disconnect

Connect
